SOCIAL MEDIA MARKETING RADAR

social media than social networks

1. Social networking. The emphasis here is on listening to customers and sharing engaging content. Facebook tends to be most important for consumer audiences and LinkedIn for business audiences.

2 Social knowledge. These are informational social networks like Yahoo! Answers, where you can help an audience by solving their problems and subtly showing how your products have helped others. Wikipedia is another site in this category, although it has relatively little application for marketing.

3 Social sharing. These are social bookmarking sites like Delicious (www.delicious.com) which can be useful for understanding the most engaging content within a category.

4 Social news. Twitter is the best-known example.

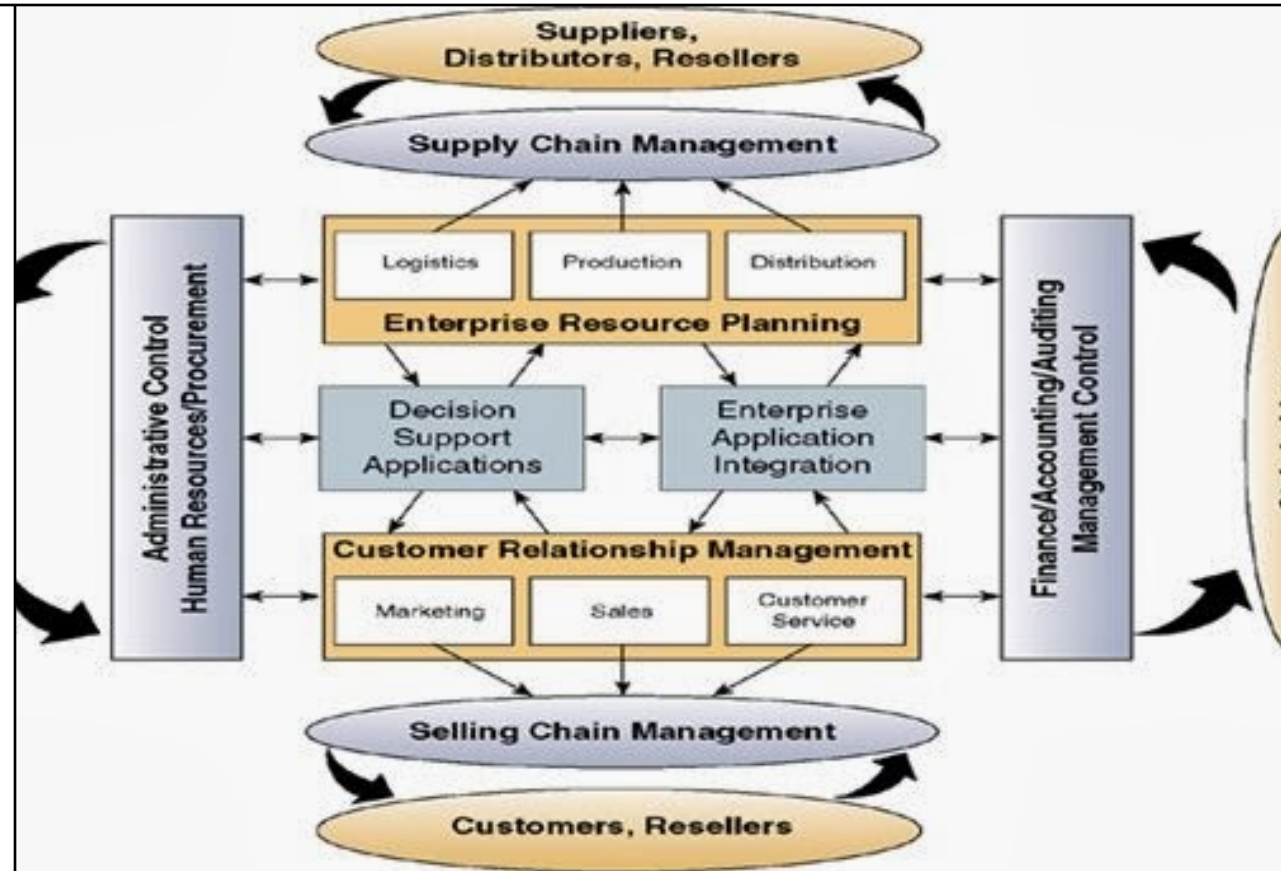

5 Social streaming. Rich and streaming media social sites for sharing photos, video and podcasting.

6 Company user-generated content and community. Distinct from the other types of social presence which are independent of companies, these are the company's own social space which may be integrated into product content (reviews and ratings), a customer support community or a blog.
