

SOAL UJIAN TENGAH SEMESTER GENAP, T.A 2023 / 2024

MATA KULIAH	: Tools & Technique for Comp. Analysis/MTI193202	DOSEN	: Joko Triloka, M.T., Ph.D
Program Studi	: Magister Teknik Informatika	WAKTU	: 7 Hari
KELAS	: 2MTI	SIFAT	: Buku Terbuka
TANGGAL	: 18 Mei 2024	KET	: Studi Kasus

Case Study for a Credit Scorecard Analysis

This study case shows how to create a credit scorecard object, bin data, display, and plot binned data information. This also shows how to fit a logistic regression model, obtain a score for the scorecard model, and determine the probabilities of default and validate the credit scorecard model using three different metrics.

You can also take a look closer by clicking "**Try This Example**" button as usual in Mathworks environment by using Matlab for more guiding and detail understanding.

Please do analysis for every result as shown by graphics, diagram, etc **by your own word**.

Similar analysis is not allowed.

Submit your work via email (*Using an Official Student Email Address: NPM@mail.darmajaya.ac.id*) with the subject **NPM_UTS_2MTI** to: **joko.triloka@darmajaya.ac.id** before Saturday, May 18, 2024 by 23:59 PM.

Good Luck.
