## **Point to Remember (Suggestions for giving directions)**

Giving street directions is really very easy when you remember to follow these points. When giving directions you are actually giving two sets of instructions.

In the first set-” Go to”- you are telling the listener what street to go to or how far to go

In the second set-” then”- you are telling the listener what to do when they get there. (turn right/left, go straight, on the left, etc.)
