ABSTRACT

Since humans were born into this world, they had to develop their knowledge. This knowledge can be developed using language and thinking skills that can transfer knowledge. Humans have many characteristics, such as the ability to absorb and develop information. The aim of this research is to know human nature as receiver and developer of information. Humans are God's creatures who are given the opportunity to try and work in the world so that one day they will return to God. Humans consist of two elements, physical and psychological. Both of these elements have their respective potentials that complement each other to strengthen human nature as God's servant and caliph on earth. According to the Qur'an, human nature is that human consists of physical, intellectual and spiritual elements. While human nature is the servant and caliph of Allah on earth, which consists of three elements, namely: physical elements, intellectual elements and spiritual elements. People think of new things because they don't just live to survive, they live to be better. This means that humans have a higher purpose in life, so that humans continue to develop the knowledge they receive, to become other different creatures. Science comes from various sources, namely
