Cause and Effect Covid-19 in Indonesia

Introduction	Coronavirus Disease 2019 or what we call COVID-19 has now become a topic of conversation all over the world. This virus originated in the city of Wuhan in China on December 2019, which currently has infected more than 20 million people in the world. An extraordinary event that could not have been imagined would be this bad. A phenomenon that can kill many sectors in a country. In Indonesia, there are more than one million people who have been positively infected by COVID-19.
Cause	Corona virus or severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2) is a virus that attacks the respiratory system. Severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), better known as the Corona virus, is a new type of coronavirus that is transmitted to humans. Apart from the SARS-CoV-2 virus or Corona virus, viruses that are also included in this group are the viruses that cause Severe Acute Respiratory Syndrome (SARS) and the viruses that cause Middle-East Respiratory Syndrome (MERS). Even though it is caused by a virus from the same group, namely the

	coronavirus or COVID-19, it has several differences with SARS and MERS, including in terms of the speed of spread and the severity of symptoms. The cause of the incident COVID-19 for the first time in Indonesia was when an Indonesian citizen met a tourist who came from Japan. The spread of this virus is increasing in the Depok area. In 2020, people in many countries around the world are almost accustomed to taking international flights like they are taking a bus or train to another city. Many people come to Indonesia, the millions of flights that take off every month help drive the spread of the coronavirus to most parts of the world in the last two years. The spread of the corona virus in Indonesia is increasing because many medical personnel are tired, so they are then infected with the virus which comes from patients. Lack of protective health personnel (APD) for medical personnel means that they have to continue to serve patients when seeking treatment even though the patient does not know the pain. Patients can only find out that they have the corona virus after carrying out a Rapid test or SWAB test which in early 2020 in Indonesia still has a few PCR tools.

Effect	Coronavirus is a collection of viruses that can infect the respiratory system. In most cases, this virus causes only minor respiratory infections, such as the flu. However, this virus can also cause severe respiratory infections, such as lung infections and death. This virus can attack anyone, such as the elderly , adults, children and babies, including pregnant women and nursing mothers. This virus is transmitted through sputum droplets from the respiratory tract, for example when in a crowded closed room with poor air circulation or direct contact with droplets. Covid-19 caused the government to issue physical distancing rules and even lockdowns in several cities so that people stay at home and don't go out to carry out their usual activities. People who want to leave the house are required to wear a mask and wash their hands. Many companies and office have the day off to work from home. Until now, school students are still learning online In addition to significant health concerns, the spread of the coronavirus will impact the global economy. Many companies lay off their employees, resulting in a decline in the country's economy. The company is unable to pay such as salaries and salaries for workers, as well as other operational and non-operational costs. This has a bad impact,
----------------------	--

	eventually workers are laid off massively, they are forced to return to their hometowns and have no other choice. The country's income from tourism has decreased. Tourists or newcomers who cannot vacation or travel to Indonesia are affected by the occurrence of this corona virus. Travel agencies, hotels, transportation, tour guides, and restaurants have also been affected by the corona virus.
Conclusion	The corona virus is caused by a virus which is very dangerous to our health. There are many causes and effects of this corona virus. Don't underestimate the impact caused by this virus, especially for our health, maintaining for your food and taking vitamins. Continue to obey government recommendations to maintain distance, wear masks and wash hands to protect us from this deadly virus.
