

# NIRMANA BIDANG

## NIRMANA BIDANG

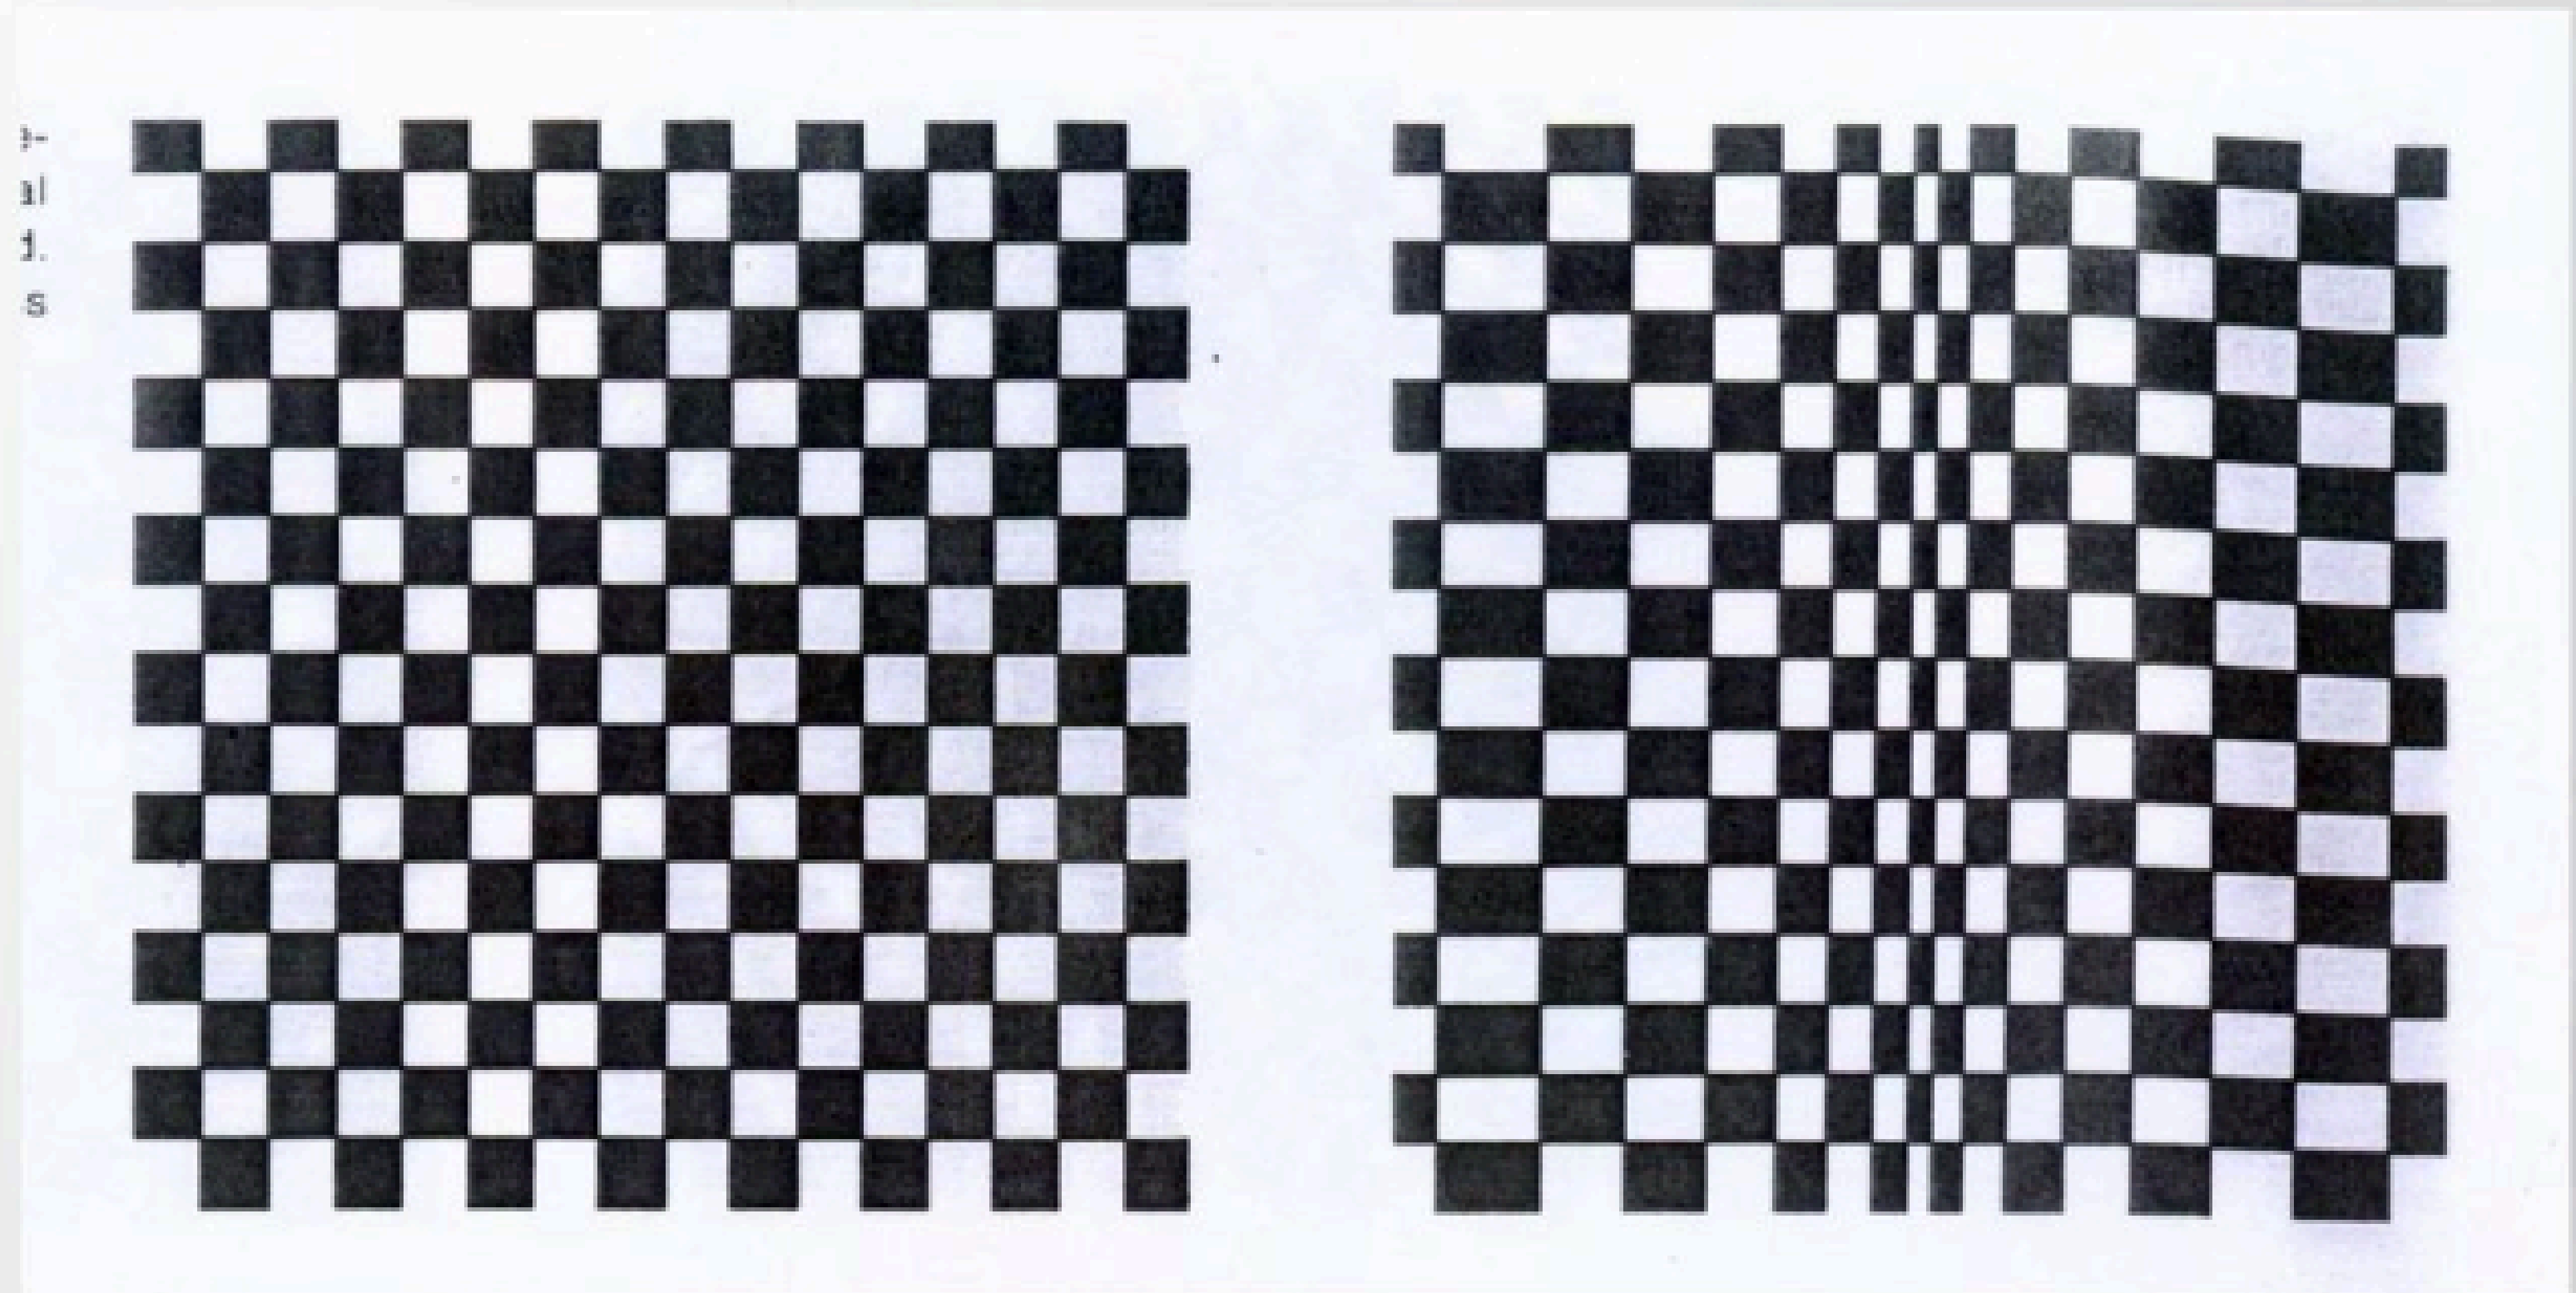

Bidang adalah permukaan datar dan dua dimensi. Sebuah bidang adalah analog dua dimensi dari titik (nol dimensi), garis (satu dimensi) dan ruang (tiga dimensi).

Bidang dapat muncul sebagai subruang dari ruang dimensi yang lebih tinggi, misalnya dinding ruangan, atau berdiri sendiri seperti pada geometri. Sebutan bidang digunakan untuk menyebut keseluruhan ruang

**Shape** | three basic shapes :  
**square, circle, and triangle**

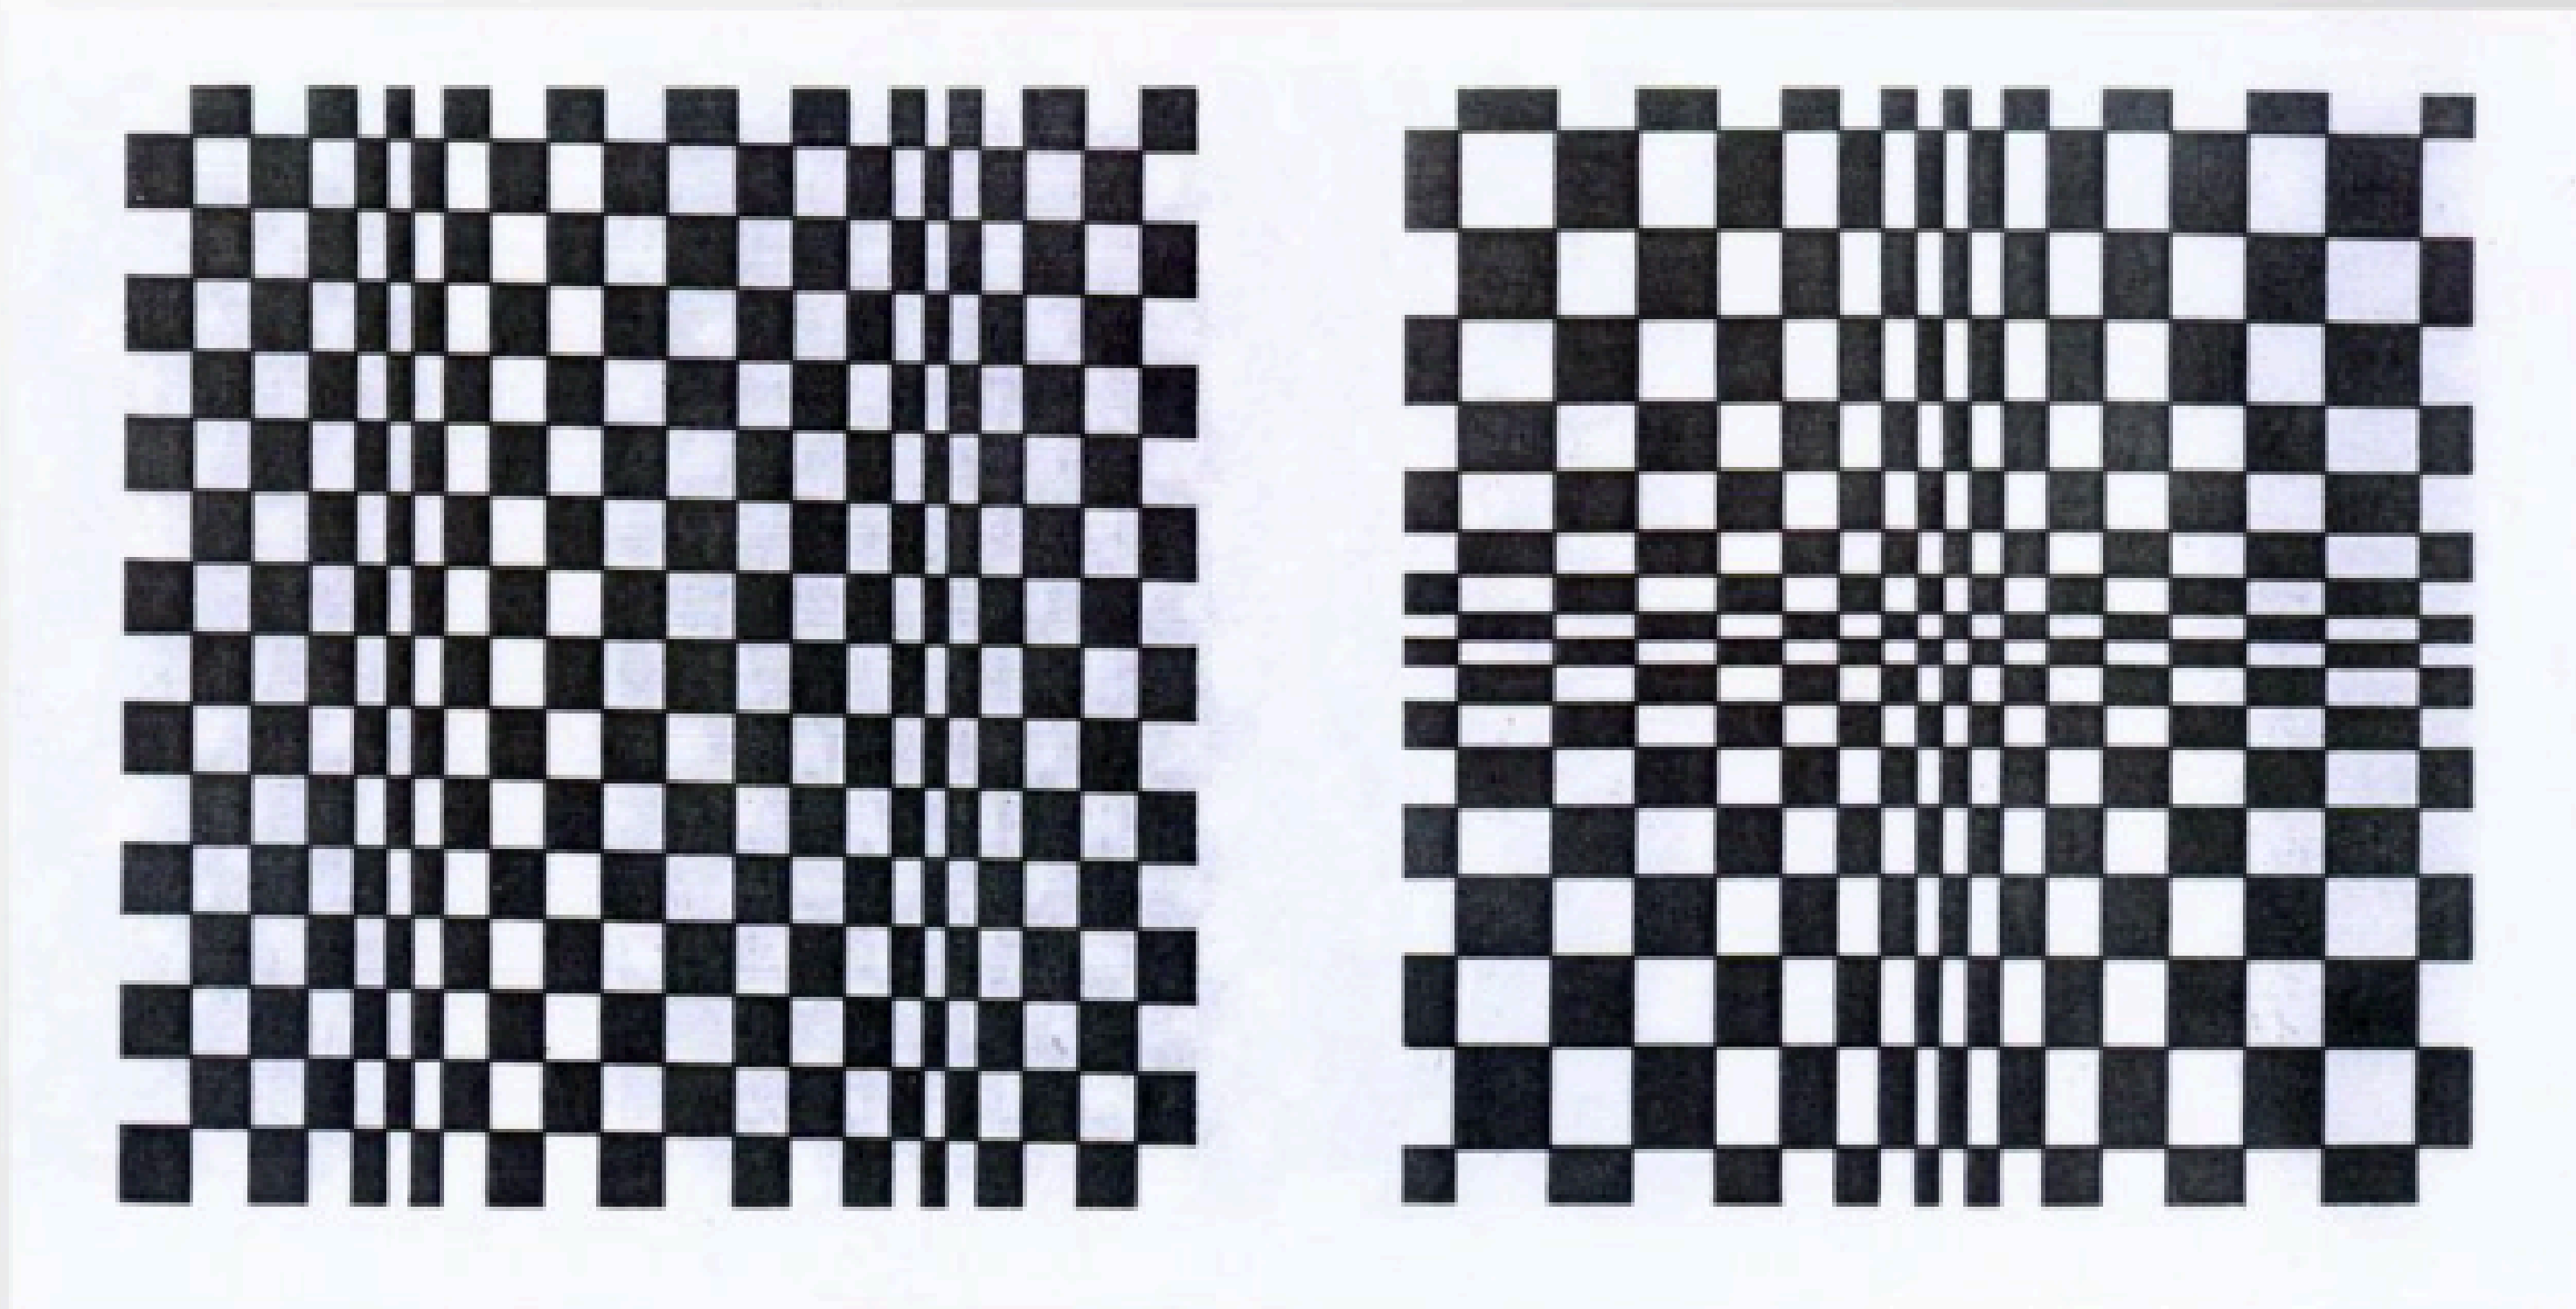

Each of these shapes has a psychological meaning associated with it. The triangle has the attitude of conflict or action. The circle gives the feeling of protection or infinity. Honesty or equality is associated with the square.
